Written proof from a veterinarian MUST be provided showing dogs current on Rabies, Parvo/Distemper, and Bordetella vaccines upon entry. Animals must also be on a flea/tick preventive and dewormer. This facility takes contagious conditions very seriously. We may refuse services to any animal displaying declining health or who pose a risk to employees. **Please make sure we are aware of any health conditions, allergies, or injuries affecting your dog.**

There is be a minimum \$40 sanitation fee for animals coming in with UNDISCLOSED active fleas, worms, or other like conditions. Open & honest communication about these challenges allows us to partner with you to manage it appropriately.

- Basic Bath includes:** Nail trim, Shampoo (& conditioner if appropriate), anal gland expression (as requested), brush out (long/curly dogs), finishing spray
- Add Trim to bath** Trim "sanitary" areas, face, and paws/paw pads (as breed appropriate) between haircuts or for large breeds with long hair.
Does NOT take any hair off legs/body of dog.
- Deshed includes:** Bath services plus additional shampoo, brushing, tools, and blowdrying to remove excess shedding fur. Also includes trimming sanitary areas and legs as breed appropriate. The price range begins with "short" haired dogs (ie: Great Danes, Mastiffs) and the upper end is for long haired breeds (Huskies, Shepards, St. Bernards, Golden Retrievers, etc.)
- Haircut Includes** Bath services above as well as any cutting of fur on the body in addition to the face, paws, and sanitary areas. Head/ears and tail brushed out and trimmed to owner's preference. Longer body lengths are charged more because they take more time and are prone to tangles.
While we always strive to meet customer requests, the length of the cut may depend on the condition of the dog's coat. If a mat cannot be brushed out, it will need to be cut off underneath to give the dog relief.
- Matted Shavedown** Matted dogs cannot be bathed prior to being clipped. Therefore, the dirt and grime severely dull clipper blades and scissors (think sandpaper dulling a knife). Since this process is very hard on equipment, we charge more to cover the cost of resharpening and tools. If a metal comb cannot move mostly freely while making contact with the dog's skin from the dog's chest to back of hip, it is considered matted. Consider a bath and brush out between haircuts to help prevent matting if you have trouble preventing matting.
- Cats** Fall under the same pricing and services as a small dog. Cats must have written proof from a veterinarian of current Rabies and FVRCP vaccinations
- Single Services** \$10 - Flea and tick or hot oil treatment added to bath
(choose any 2 single services and get \$5 off!)
- \$15 - Nail Trim, face trim, sanitary trim, ear pluck, additional trim areas (no additional charge if getting w/ haircut)
- \$20 - Add color treatment of 1 body area to groom (tail, feet, ears, etc)
- \$40 - Skunk treatment - add to bath price below
-

Dogs with coats in good condition without mats will not generally go outside the below matrix. Additional fees will be added for tight curl coats, heavy under coats, and moderate to severely matted dogs. We are happy to estimate any additional costs after the groomer has looked over the dog before beginning the groom. However, not all potential issues can be foreseen.
